Project 2012-05 MOD A

Implementation Plan for MOD-001-2 – Available Transmission System Capability

Approvals Required

MOD-001-2 – Available Transmission System Capability

Prerequisite Approvals

There are no other standards that must receive approval prior to the approval of this standard.

Revisions to Glossary Terms

None

Applicable Entities

Transmission Operator

Transmission Service Provider

Applicable Facilities

N/A

Conforming Changes to Other Standards

None

Effective Dates

MOD-001-2 shall become effective as follows:

1. MOD-001-2 shall become effective the first day of the seventh calendar quarter after the effective date of the order providing applicable regulatory approval.
2. In those jurisdictions where no regulatory approval is required, MOD-001-2 shall become effective the first day of the fifth calendar quarter Board of Trustees' approval, or as otherwise made effective pursuant to the laws applicable to such ERO governmental authorities.

Justification

NERC is working with the North American Energy Standards Board (NAESB) to transition those elements of the existing standards that relate to commercial or business practices and will not be

retained in MOD-001-2 from the NERC Reliability Standards to NAESB's business practice standards. The 18-month implementation period will provide sufficient time for NAESB, working through its business practice development process, to adopt standards that address the requirements proposed for retirement. NERC expects that following Board of Trustee approval of the proposed standard, NERC will submit a request to NAESB to adopt the standards proposed or retirement into their commercial and business practice standards and to consider the commission directives associated with those standards. NERC expects that in adopting the standards to be retired, NAESB will provide for an effective date that will coincide with the effective date proposed in MOD-001-2.

Retirements

MOD-001-1a, MOD-004-1, MOD-008-1, MOD-028-1, MOD-029-1a, and MOD-030-2 shall be retired upon MOD-001-2 becoming effective.
