

Nomination Form for the Reliability Issues Steering Committee Membership

Collector: Web Link 1 (Web Link)
Started: Thursday, December 21, 2023 11:56:58 AM
Last Modified: Thursday, December 21, 2023 12:15:10 PM

Page 1: Nominations are due by December 29, 2023

Q1

Information about the nominator:

First and Last Name	Morenike Miles
Company	Dominion Energy
Email Address	morenike.k.miles@dominionenergy.com
Phone Number	8043859539

Q2

Information about the nominee:

First and Last Name	Morenike Miles
Organization	Dominion Energy
Email Address	morenike.k.miles@dominionenergy.com
Phone Number	8043859539

Q3

Briefly describe the nominee's experience and qualifications to serve on the RISC:

I serve as Vice President and Chief Compliance Officer of Dominion Energy, a utility holding company headquartered in Richmond, VA. As of December 31, 2022, Dominion Energy's portfolio of assets includes approximately 31.0 GW of electric generating capacity, 10,600 miles of electric transmission lines, 78,500 miles of electric distribution lines and 93,500 miles of gas distribution mains and related service facilities, which are supported by 4,000 miles of gas transmission, gathering and storage pipeline. As of December 31, 2022, Dominion Energy operates in 15 states and serves approximately 7 million customers.

I am a graduate of the University of Virginia and the University of Michigan Law School and, prior to working for Dominion Energy, practiced law at Latham & Watkins, LLP, a global law firm, and worked for Alliant Energy, in Madison, WI, providing legal support for renewable energy infrastructure development.

Since joining Dominion Energy in 2006, I have served in leadership and executive roles in Law, Enterprise Risk Management, Supply Chain, Governance, Sustainability and, now, Compliance. In addition to currently leading Dominion Energy's Regulatory Compliance team, I also lead the company's NERC Enterprise Policy & Compliance and Electric Market Policy organizations. Together, these experiences have provided me with a deep understanding of the challenges associated with maintaining grid reliability and security while supporting electrification and load growth and deploying the low- and zero-carbon technologies required to advance the clean energy transition.

My work experience aligns closely with the RISC's areas of responsibility:

- Through my leadership of the NERC Enterprise Policy & Compliance (NEPC) organization, I have developed direct knowledge of the NERC Reliability Standards, NERC's policy priorities, ERO governance and stakeholder engagement, the reliability impact of technologies such as inverter-based resources, Dominion Energy's physical and cyber security threat environment and our associated safeguards for critical energy infrastructure and systems. As a result of my management of NEPC employees with engineering and technical backgrounds, and close collaboration with business unit operational colleagues, I am also familiar with the operational and technical considerations associated with maintaining grid reliability.
- As leader of Dominion Energy's Electric Market Policy organization, I am familiar with the complex dynamics of regional grid operations and their reliability implications, as well as various FERC and RTO initiatives intended to promote system reliability, such as capacity market reform, generator interconnection reform and gas-electric coordination.
- My previous role as Vice President – Sustainability & Compliance provided deep experience with the resource mix, dispatchability considerations and policy frameworks needed to achieve economy-wide decarbonization while maintaining customer reliability and affordability.
- In my earlier role as Vice President – Governance & Compliance and Assistant Corporate Secretary, I worked closely with and advised Dominion Energy's Board of Directors on matters of strategic importance.
- My experience leading the operations of our Enterprise Risk Management function allowed me to explore a breadth of strategic, operational, financial and regulatory risks affecting the energy industry and associated mitigating strategies. Through this role, I also developed a deep appreciation for the value of risk-informed analysis and decision making.
- All my executive and other leadership experiences have promoted my ability to navigate complex issues, communicate effectively, collaborate with stakeholders and lead through periods of change.

Thank you for the opportunity to share my experiences and qualifications with the RISC Nominating Committee.

Q4

Select each area for which the nominee has expertise or oversight: Description of each Risk Profile can be found in the The 2023 ERO Reliability Risk Priorities Report

Energy Policy,
Resilience to Extreme Events,
Security Risks,
Critical Infrastructure Interdependencies,
Grid Transformation

Q5

Select each NERC Region that you represent:

NPCC,
RF,
SERC

Q6

Select each Industry Segment that you represent:

Transmission Owners,
Load-serving Entities,
Electric Generators

Q7

Select each Registered Function for which the nominee has expertise or oversight: These functions are defined in the NERC Functional Model, which is downloadable from the NERC Web site.

Balancing Authority,
Distribution Provider,
Generator Operator,
Generator Owner,
Interchange Coordinator,
Load-Serving Entity,
Planning Coordinator,
Purchasing-Selling Entity,
Resource Planner,
Transmission Operator,
Transmission Owner,
Transmission Planner,
Transmission Service Provider

Q8

Reference #1:

First and Last Name

Ed Baine

Organization

President - Dominion Energy Virginia

Email Address

ed.baine@dominionenergy.com

Phone Number

804-819-2094

Q9

Reference #2:

First and Last Name

Adrienne Collins

Organization

Senior Vice President - Power Delivery, Southern Company

Email Address

acollins@southernco.com

Phone Number

404-202-8906
