

Meeting Notes

Project 2020-02 Modifications to PRC-024 (Generator Ride-through) Drafting Team

May 29, 2024 | 9:00 a.m. - 11:00 a.m. Eastern

Conference Call with Web Access

Administrative

1. **Review NERC Antitrust Compliance Guidelines and Public Announcement**

2. **Determination of Quorum**

The rule for NERC Standard Drafting Team (SDT) states that a quorum requires two-thirds of the voting members of the SDT to be physically present. Quorum was met. See table below for meeting attendance.

3. **Introductions and Chair's Remarks**

Agenda Items

1. **Review Current Agenda**

2. **Continue Reviewing comments**

3. **Discuss Next Steps, Timeline, and Future Meetings - informational 10 minutes**

4. **Adjourn**

J. Calderon initiated the meeting, called roll, and reviewed the NERC Antitrust Guidelines and Participant Policy.

The team continued to review comments provided during the initial draft comment period. Revisions mostly focused on the removal of the separate phase jump requirement. Many commenters found that this requirement would be difficult to routinely provide assurance of compliance with as trigger setpoints are generally set not going to determine if the measurement is the result of a fault or transmission switching event. Nor was the drafting team's direction looking to require that the distinction be known at the time of the measurement. To clarify that what was intended was an exclusion for an IBR failing to ride-through as the result of a non-fault switching event, the team moved this piece of the phase jump requirement into R1. As this represents a particular exemption from ride-through requirements, this change should resolve the other concerns regarding how to measure this routinely.

J. Calderon reviewed changes made throughout the consideration of comments document regarding the removal of the TOV requirement and will review the comment responses again to provide a common response to removing the phase angle requirement.
