J. Calderon initiated the meeting, called roll, and reviewed the NERC Antitrust Guidelines and Participant Policy.

The team continued to review comments provided during the initial draft comment period. Revisions to PRC-024 were made to ensure that Type 1 and Type 2 wind facilities were included within those drafts. A footnote to clarify that voltage ride-through requirements for any facilities with phase lock loop loss of synchronism was in a previous version of the draft and has been added back in to address that directive. A majority of comments related to RoCoF and what was required to be measured during voltage excursion. Clarity has been included within the notes to address this. Additional language will be provided within the technical rationale as well. J. Calderon also shared the latest versions of the draft of PRC-024 with the participants from Quebec and requested that any revisions to their section of PRC-024 be provided at their earliest convenience.

The team is looking to post June 14, 2024.
