## Standards Announcement

### Project 2006-02 Assess Transmission and Future Needs Recirculation Ballot Results

Now available at: <https://standards.nerc.net/Ballots.aspx>

#### **Ballot Results for Revisions to TPL-001-2**

A recirculation ballot on revisions to TPL-001-2 — Transmission System Planning Performance Requirements concluded on Friday, July 22, 2011. The revised standard, TPL-001-2, was approved by the associated ballot pool.

Voting statistics are listed below, and the [Ballot Results](#) Web page provides a link to the detailed results:

Quorum: 94.33%

Approval: 75.37%

#### **Next Steps**

TPL-001-2 will be presented to the NERC Board of Trustees for adoption and filed with regulatory authorities.

#### **Background**

TPL-001-2 is designed to be a single, comprehensive, and coordinated standard that merges the requirements of four existing standards: TPL-001-1; TPL-002-1b; TPL-003-1a; TPL-004-1 and also results in the retirement of TPL-005 and TPL-006. The proposed standard includes several new definitions. The purpose of the proposed standard is to establish transmission system planning performance requirements within the planning horizon to develop a bulk electric system that will operate reliably over a broad spectrum of system conditions and following a wide range of probable contingencies.

Additional information about this project is available on the project page at <http://www.nerc.com/filez/standards/Assess-Transmission-Future-Needs.html>.

#### **Standards Development Process**

The [Standard Processes Manual](#) contains all the procedures governing the standards development process. The success of the NERC standards development process depends on stakeholder participation. We extend our thanks to all those who participate. For more information or assistance, please contact Monica Benson at [monica.benson@nerc.net](mailto:monica.benson@nerc.net).
