4. **Standard Drafting Team Questions of FERC Staff — SDT**
5. **Next Steps — John Lim & Philip Huff**
6. **Adjourn**

Standard Drafting Team Preliminary Questions of FERC Staff — SDT

- a. Does FERC see any “gaps” in the draft CIP Standards as published? Please describe. If so, please provide some direction on how they should be closed.
- b. Does FERC see any “show stoppers” in the current set of draft CIP Standards that would cause the standards to not be approved?
- c. Please provide feedback on the new proposed structure of the CIP Standards (CIP-010 & CIP-011 vs. CIP-002 through CIP-009). State any likes and dislikes.
- d. Please provide feedback on the proposed table structure for the draft requirements in CIP-011. Suggest any improvements that should be made.
- e. Please provide input concerning the proposed “bright lines” defined in the new draft CIP Standards, as presented in Attachment 2 to CIP-010.
- f. Please provide input on the proposed schedule for completion of the current draft version of the CIP Standards (CIP-010 & CIP-011).
- g. In its proposed schedule, the drafting team has deferred addressing a small subset of the Order 706 directives that are very complex and would require extensive industry deliberation in addressing them. Please provide any comment or feedback on this approach. .
- h. Please provide input on the proposed Implementation Plan concepts for the CIP-010 & CIP-011 standards.
- i. Please describe FERC’s plans to support the individual drafting sub-teams and the full SDT going forward.
- j. Specific discussion topics include:
 - 1) Immediate revocation requirements included in FERC Order 706
 - 2) Appropriate application of TFEs for the new draft standards
- k. Please discuss the list of items/issues (if any) that are still open that must be resolved prior to approval of the new draft CIP Standards.
- l. Please provide a sense of acceptability of the new draft CIP Standards to FERC staff. What improvements or changes in direction are needed to achieve acceptability?
