

Standards Announcement

Project 2015-09 Establish and Communicate System Operating Limits

Standard Drafting Team Nomination Period Open through September 2, 2015

[Now Available](#)

Nominations are being sought for standard drafting team (SDT or team) members through **8 p.m. Eastern, Wednesday, September 2, 2015.**

Use the [electronic form](#) to submit a nomination. If you experience any difficulty using the electronic form, contact [Nasheema Santos](#). An unofficial Word version of the nomination form is posted on the [Standard Drafting Team Vacancies](#) page and the [project page](#).

By submitting a nomination form, you are indicating your willingness and agreement to participate in the SDT face-to-face meetings and conference calls.

The time commitment for this project is expected to be an average of two face-to-face meetings per quarter (typically two full working days each meeting), with conference calls scheduled as needed to meet the agreed upon timeline the SDT sets forth. Team members will have side projects, either individually or by sub-group, to present to the entire team for discussion and review. Lastly, an important component of the SDT effort is outreach. Members of the team will be expected to conduct industry outreach during the development process to support a successful ballot.

Previous SDT experience is beneficial but not required.

Project 2015-09 Establish and Communicate System Operating Limits

The purpose of this project is to revise requirements for determining and communicating System Operating Limits (SOLs) used in the reliable planning and operation of the Bulk Electric System (BES). Revisions are necessary to improve the requirements by eliminating overlap with approved Transmission Planning (TPL) requirements, enhancing consistency with Transmission Operations (TOP) and Interconnection Reliability Operations (IRO) standards, and addressing issues with determining and communicating SOLs and Interconnection Reliability Operating Limits (IROLs). The project will revise the necessary requirements and definitions in order to address the issues identified in [Project 2015-03 Periodic Review of System Operating Limit Standards](#).

Next Steps

The Standards Committee is expected to appoint members to the SDT in September 2015. Nominees will be notified shortly after they have been appointed to the team.

For information on the Standards Development Process, refer to the [Standard Processes Manual](#).

For more information or assistance, contact Standards Developer, [Lacey Ourso](#) (via email) or at (404) 446-2581.
