

Q&A Session for Project 2021-03 CIP-002 Industry Webinar

Session number: 23161607684
September 25, 2024

1: What is the implementation schedule for newly identified Low Impact BES Cyber Systems?

This question has been answered verbally.

2: Just a minor point - I believe the word "transmission" in the draft definition should be capitalized.

This question has been answered verbally.

3: If TO was added to the Control Center definition why wasn't GO?

This question has been answered verbally.

4: Why wasn't 'reliability tasks' included in the TO criteria of the definition? A TO has defined reliability tasks like an RC, BA, and TOP in PER-005?

This question has been answered verbally.

5: It just seems like if the TO has defined reliability tasks it would add clarity to the situations where there is a need to identify a TO Control Center. Again, a TO has defined tasks in PER-005.?

This question has been answered verbally.

6: It was brought up a couple of times during the tech conference that in addition to hardware limitation, there is also corresponding software limitation/challenges that need to be considered. Can you provide rationale for not including software exemptions?

This question has been answered verbally.

7: Why was CIP-013 left out of the body of requirements necessary for a "new" medium?

This question has been answered verbally.

8: If the application of new Criteria 2.12 results in a lower rating, may an entity adopt CIP-002-8 prior to the enforcement date?

This question has been answered verbally.
